

Syllabus

Duration: 3 Month

1. Basic Excel

Module 1: Introduction to Excel

- Overview of Excel Interface
- Workbook and Worksheet Basics
- Basic Navigation and Shortcuts

Module 2: Working with Data

- Entering and Formatting Data
- Copy, Cut, Paste, and Fill
- Basic Number Formatting (Currency, Percentages, Dates)

Module 3: Essential Functions

- Arithmetic Functions (SUM, AVERAGE, MIN, MAX)
- Logical Functions (IF)
- Text Functions (CONCATENATE, LEFT, RIGHT, LEN)

Module 4: Basic Data Management

- Sorting and Filtering Data
- Removing Duplicates
- Freezing Panes and Splitting Windows

Module 5: Basic Charts and Visualizations

- Creating Simple Charts (Bar, Line, Pie)
- Adding Chart Titles, Legends, and Labels
- Modifying Chart Styles

Module 6: Printing and Sharing

- Page Layout and Print Settings
 - Protecting Workbooks
 - Saving and Sharing Files in Different Formats
-

2. Advanced Excel

Module 1: Advanced Formulas and Functions

- Logical Functions (IF, AND, OR, IFERROR)
- Lookup Functions (VLOOKUP, HLOOKUP, INDEX-MATCH, XLOOKUP)
- Array Formulas and Dynamic Arrays
- Statistical Functions (COUNTIFS, SUMIFS, AVERAGEIFS)

Module 2: Data Analysis Tools

- Pivot Tables and Pivot Charts
 - Grouping and Custom Calculations
 - Using Slicers for Filtering
- What-If Analysis (Scenario Manager, Goal Seek)
- Data Tables for Sensitivity Analysis

Module 3: Advanced Data Handling

- Data Validation (Drop-Down Lists, Custom Rules)
- Consolidating Data Across Sheets
- Advanced Sorting and Filtering Techniques

Module 4: Introduction to Power Query

- Importing Data from External Sources
- Data Transformation Basics
- Merging and Appending Datasets

Module 5: Advanced Visualization

- Creating Advanced Charts (Combo Charts, Sparklines, Waterfall Charts)

- Conditional Formatting (Using Formulas)
- Interactive Dashboards in Excel

Module 6: Automation with Macros

- Recording and Running Macros
 - Editing VBA Code for Custom Automation
 - Creating Buttons for Macro Execution
-

3. Power BI

Module 1: Getting Started with Power BI

- Introduction to Power BI Desktop
- Overview of Power BI Ecosystem (Desktop, Service, Mobile)
- Installing and Setting Up Power BI

Module 2: Data Import and Transformation

- Connecting to Data Sources (Excel, Databases, Web)
- Data Transformation with Power Query
 - Handling Missing Data
 - Splitting, Merging, and Formatting Columns

Module 3: Data Modeling

- Understanding Relationships Between Tables
- Creating and Managing Data Models
- Star and Snowflake Schema Basics

Module 4: Introduction to DAX (Data Analysis Expressions)

- Calculated Columns vs. Measures
- Essential DAX Functions (SUM, AVERAGE, COUNT, DISTINCTCOUNT)
- Logical and Conditional Functions (IF, SWITCH)
- Time Intelligence Functions

Module 5: Data Visualization and Reporting

- Designing Dashboards
 - Bar, Line, Pie, and Combo Charts
 - Maps and Tables
- Using Slicers, Filters, and Drill-Throughs
- Best Practices for Visual Design

Module 6: Power BI Service

- Publishing Reports to the Power BI Service
- Sharing and Collaborating on Dashboards
- Row-Level Security (RLS) Basics
- Scheduled Data Refresh

Module 7: Advanced Features

- Custom Visuals and Themes
- Optimizing Report Performance
- Integrating Power BI with Excel and Other Tools
- Overview of Power BI Mobile

Extra Benefit:

- 1- Live Project Practice
- 2- Interview Questions Preparation.
