Java Full stack Professional Course with UI/UX

Design, Develop, Innovate with the Power of **AI!**

Master UI/UX & Java Full Stack with AI Skills

Create Smart
Interfaces

Build Full Stack
Applications

Innovate
with AI Tools

Shape the
Future

8-Month Java Full Stack Development with UI/UX Course Syllabus +Internship on Project

Duration: 8 Months

- Module 1: Core Java
- Module 2: Data Structures & Algorithms
- Module 3: Advanced Java (JDBC, JSP, Servlets)
- Module 4: Database (MySQL) (2 s)
- Module 5: GUI Application Development (Swing, AWT) (2 s)
- Module 6: Web Development (HTML, CSS, Bootstrap, JS)
- Module 7: Java Frameworks (Hibernate, Spring MVC, Spring Boot)
- Module 8: UI/UX with Figma and Canva

Module 1: Core Java

✓ 1: Java Basics

- Introduction to Java & Features
- Java Installation (JDK, JRE, JVM)
- Data Types
- Variables,
- Operators
- Control Statements (if-else, switch, loops)
- Array
- String
- Jump Statements (break, continue, return)
- This, super, static keyword
- Package
- Access Specifiers

✓ 2: OOPs Concepts in Java

- Classes and Objects

- Constructors
- Encapsulation, Abstraction
- Inheritance & Polymorphism

✓ 3: Exception Handling & Multithreading

- Try, Catch, Finally
- Checked & Unchecked Exceptions
- Thread Lifecycle & Synchronization
- Inter-thread Communication

✓ 4: Collections Framework

- ArrayList, LinkedList, HashMap
- Set, Queue, Stack, PriorityQueue
- Comparator vs Comparable
- Lambda Expressions

Module 2: Data Structures & Algorithms

✓ 5: Arrays & Strings

- 1D & 2D Arrays
- Searching (Linear, Binary)
- Sorting (Bubble, Selection, Merge, Quick)
- String Manipulations & Pattern Matching

✓ 6: Linked List & Recursion

- Singly & Doubly Linked List
- Circular Linked List
- Reverse a Linked List
- Recursion (Factorial, Fibonacci, Tower of Hanoi)

✓ 7: Stack, Queue, Deque

- Stack Implementation (Array, Linked List)
- Queue (Circular, Priority)
- Deque Operations

✓ 8: Trees & Graphs

- Binary Trees & Binary Search Tree
 - Tree Traversal (Inorder, Preorder, Postorder)
 - Graph Representation (Adjacency List, Matrix)
 - BFS & DFS Algorithms
-

Module 3: Advanced Java (JDBC, JSP, Servlet)

✓ 9: JDBC (Java Database Connectivity)

- JDBC Drivers & Connections
- CRUD Operations with MySQL
- PreparedStatement & CallableStatement
- Transaction Management

✓ 10: JSP (Java Server Pages)

- JSP Lifecycle
- JSP Directives, Scripting Elements
- JSP Implicit Objects
- JSP with MySQL

✓ 11: Servlets

- Servlet Lifecycle & Configuration
- RequestDispatcher & sendRedirect
- Cookies & Session Management
- Servlet Filters & Listeners

✓ 12: MVC Architecture in Java

- Introduction to MVC Pattern
 - JSP & Servlets in MVC
 - Form Handling in JSP & Servlet
-

Module 4: Database with MySQL (2 s)

✓ 13: SQL Basics

- MySQL Installation & Setup
- SQL Queries (SELECT, INSERT, UPDATE, DELETE)
- Joins, Views, Indexing

✓ 14: Advanced SQL

- Stored Procedures & Functions
 - Transactions & ACID Properties
 - Triggers & Cursors
-

Module 5: GUI Application Development (Swing, AWT)

✓ 15: AWT (Abstract Window Toolkit)

- AWT Components (Button, Label, TextField)
- Event Handling in AWT
- AWT Layout Managers

✓ 16: Swing

- Swing Components (JFrame, JPanel, JButton)
 - JTable, JScrollPane, JDialog
 - Menu-driven GUI Applications
-

Module 6: Web Development (HTML, CSS, Bootstrap, JS)

✓ 17: HTML & CSS

- HTML Basics, Forms, Media Elements
- CSS Selectors & Properties
- Flexbox & Grid Layout

✓ 18: CSS3 & Bootstrap 5

- Advanced CSS3 Animations & Transitions
- Responsive Design with Bootstrap 5
- Bootstrap Grid System

✓ 19: JavaScript & DOM

- JavaScript Basics (Variables, Functions)
- DOM Manipulation
- Event Handling & Form Validation

✓ 20: Advanced JavaScript & AJAX

- ES6 Features (Arrow Functions, Promises)
 - Fetch API & AJAX
 - JavaScript Frameworks Introduction
-

Module 7: Java Frameworks (Hibernate, Spring MVC, Spring Boot)

✓ 21: Hibernate ORM Framework

- Introduction to Hibernate
- Hibernate Configuration & Mapping
- Hibernate Query Language (HQL)
- CRUD Operations in Hibernate

✓ 22: Spring MVC

- Spring Framework Overview
- Spring MVC Architecture
- Controllers, Views & Models
- Spring Boot vs Spring MVC

✓ 23: Spring Boot Basics

- Setting up a Spring Boot Project
- REST API Development
- Dependency Injection in Spring Boot

✓ 24: Spring Boot & Microservices

- Spring Boot with Database
 - Spring Boot Security & JWT Authentication
 - Introduction to Microservices
-

Module-8

UI / UX

UI (User Interface)

UI means the **visual design** of an application or website—what users see and interact with. It includes:

- Buttons
- Colors
- Layouts
- Typography
- Icons

Example: Login page design, colors, button style = UI

UX (User Experience)

UX means the **overall experience** of the user while using the product. It focuses on:

- Easy navigation
- Fast performance
- User satisfaction
- Problem solving

Example: User easily login kar pa raha hai ya confuse ho raha hai = UX

Simple Difference

UI	UX
Looks (Design)	Feel (Experience)
Visual elements	User journey
Colors, buttons	Ease of use

Introduction to UI/UX

- What is UI/UX
 - Difference between UI & UX
 - Importance of UI/UX in industry
 - Real-world examples (Apps, Websites)
-

Design Fundamentals

- Color Theory
 - Typography
 - Layout & Grid System
 - Design Principles (Balance, Contrast, Alignment)
-

UX Research

- User Research
 - User Persona
 - User Journey Mapping
 - Competitor Analysis
-

Wireframing

- Low-fidelity wireframes
 - High-fidelity wireframes
 - Paper sketching
 - Tools introduction
-

UI Design Tools

- Figma (Most important)
- Canva

Practical:

- Create Login Page
 - Create Dashboard UI
-

Prototyping

- Interactive design
 - Clickable prototypes
 - Animation basics
 - Micro-interactions
-

UX Principles

- Usability
 - Accessibility
 - Heuristic evaluation
 - User testing
-

Mobile App Design

- Android & iOS guidelines
 - Responsive design
 - Mobile-first approach
-

Web Design

- Website layout design
 - Landing page design
 - Responsive web design
-

Real Projects

- E-commerce app design

- Student management system UI
 - Portfolio design
-

Capstone Project

At the end of the course, students will work on a **real-world project** combining all learned technologies:

- ✓ **Bank Management System** (Java, MySQL, JDBC, Swing)
 - ✓ **E-Commerce Website** (JSP, Servlet, Hibernate, Spring Boot)
 - ✓ **Online Library Management System** (JSP, MySQL, Bootstrap)
-

UI/UX + Java Full Stack Job Roles

1-UI Developer

A UI Developer focuses on creating the **visual part of websites or applications**. They convert design (from tools like Figma) into real web pages using code.

Skills:

- HTML, CSS, JavaScript
- React / Angular
- Basic understanding of UI design

2. Frontend Developer

A Frontend Developer builds the **user-facing side** of applications. They ensure the website looks good and works smoothly on all devices.

Responsibilities:

- Implement UI/UX designs
- Make responsive layouts
- Improve performance

3. Java Full Stack Developer

A Java Full Stack Developer works on **both frontend and backend**.

Frontend:

- HTML, CSS, JavaScript, React

Backend:

- Java, Spring Boot

Database:

- MySQL / MongoDB

With UI/UX knowledge, they build better user-friendly applications.

4. UX Engineer

A UX Engineer is a hybrid role between **designer and developer**.

Work includes:

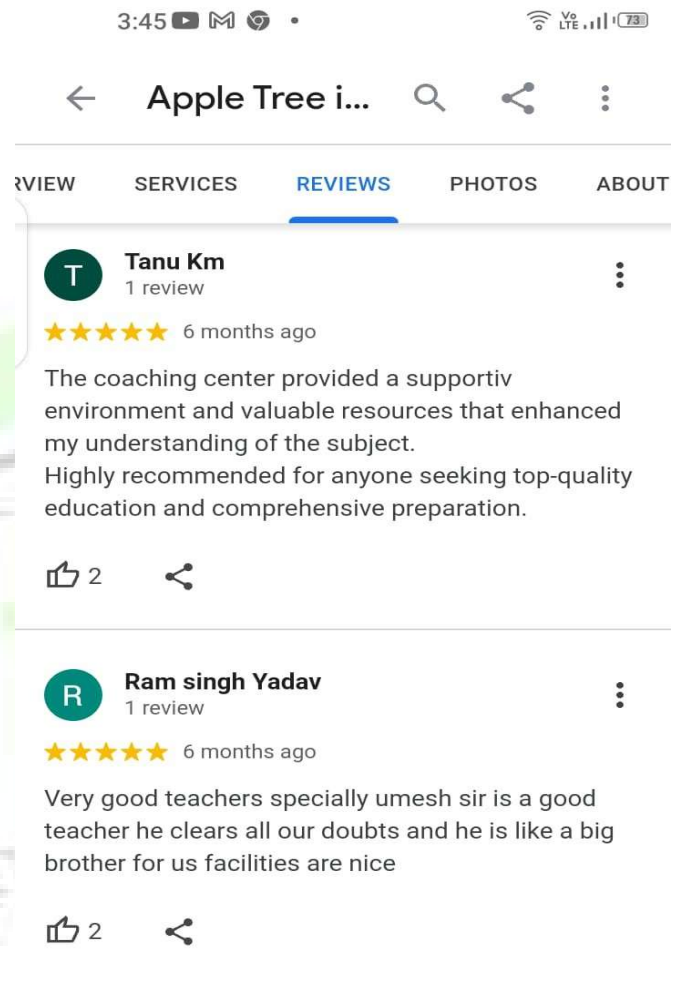

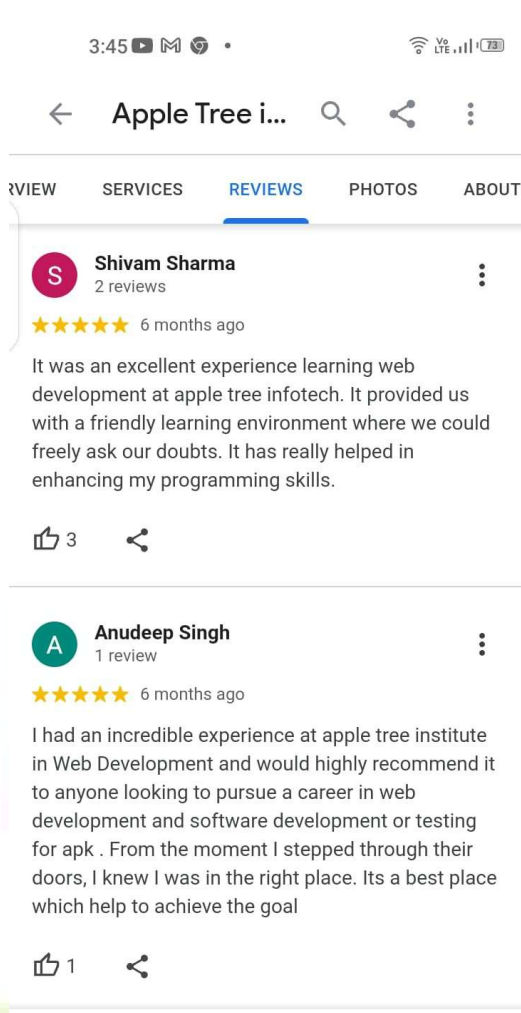

- Improving user experience
- Creating interactive prototypes
- Writing frontend code

High-demand role in product-based companies.

Salary Idea (India - Approx)

- UI/UX Designer: ₹3L – ₹8L
- Frontend Developer: ₹4L – ₹12L
- Java Full Stack Developer: ₹6L – ₹20L+
- UX Engineer: ₹10L+

Student Reviews:

Career Development Training Center

★★★★★ 5 months ago

Overall Rating: 4.5/5

1. Comprehensive curriculum: Covered all essential Java concepts.
 2. Engaging instructors: Explained complex topics clearly.
 3. Hands-on exercises: Helped solidify understanding.
 4. Real-world
- I am satisfied with this Internship training.👍
