Overview

PHP originally stood for Personal Home Page. It is a server side scripting language which is used to creating dynamic webpage. PHP is open source, which means you do not have to pay for its licensing and hosting. No wonder that the number of websites using PHP development has increased exponentially over the past few years.

Why we are different?

Main benefits you are getting from our Center

Life time validity (if you face any type of problem in any training module, you can continue that module)

Good job assistance

You will get an opportunity to **work on real time projects**

Interaction with Industry Experts

Small Batches to focus on each student

We mainly focus on **practical classes rather than theoretical classrooms.**

You will get a chance to involve in live project

Core PHP

Introduction to PHP

- ✓ Evaluation of Php
- ✓ Basic Syntax
- ✓ Defining variable and constant
- ✓ Php Data type
- ✓ Operator and Expression

Handling Html Form With Php

- ✓ Capturing Form Data
- ✓ Dealing with Multi-value filed
- ✓ Generating File uploaded form
- ✓ Redirecting a form after submission

Decisions and loop

- ✓ Making Decisions
- ✓ Doing Repetitive task with looping
- ✓ Mixing Decisions and looping with Html

Function

- ✓ What is a function
- ✓ Define a function
- ✓ Call by value and Call by reference
- ✓ Recursive function

String

- ✓ Creating and accessing String
- ✓ Searching & Replacing String
- ✓ Formatting String
- ✓ String Related Library function

Array

- ✓ Anatomy of an Array
- ✓ Creating index based and Associative array

- ✓ Accessing array Element
- ✓ Looping with Index based array
- ✓ Looping with associative array using each() and foreach()
- ✓ Some useful Library function
